

SHWET BANKTESH TIWARI

Vasai East, Maharashtra, India | +91 9769965677
tiwarishwet30@gmail.com | linkedin.com/in/tiwarishwet1 | github.com/tiwarishwet1

PROFESSIONAL SUMMARY

Results-driven AI & Backend Engineer with experience building scalable architectures and automated agentic pipelines. Expert in integrating LLMs (OpenAI, Claude) into robust backend ecosystems. Proficient in quantitative analysis and data visualization, with a strong foundation in core Computer Science principles and financial modeling. Backed by IEEE publications and a track record of competitive engineering success; dedicated to delivering measurable business impact through technical rigor.

TECHNICAL SKILLS

Languages: Python, Java, SQL (HackerRank Certified)

AI/ML: LLM Orchestration, Prompt Engineering, Agents, TensorFlow, Keras, Scikit-learn, Transformers, Computer Vision, NLP

Data Analytics: Power BI, Tableau, Excel, Quantitative Finance Concepts

Backend DevOps: FastAPI, Flask, REST APIs, Git, GitHub, GitHub Actions, Docker, Kubernetes, YAML

Databases: MySQL, MS SQL Server, PostgreSQL, Query Optimization

Core CS: Operating Systems (OS), Computer Networks (CN), Object-Oriented Programming (OOP)

PROFESSIONAL EXPERIENCE

Pristine Nexus

Backend Engineer Intern

Maharashtra, India

May 2025 – May 2026

- Spearheaded backend microservices development with FastAPI, improving system latency by 94% and enhancing throughput.
- Optimized MS SQL Server relational schemas and Stored Procedures, reducing reporting query execution time by 98%.
- Established automated API validation pipelines using Postman, reducing regression faults by 92%.
- Automated operational data preprocessing with Pandas, facilitating data-driven decision-making for stakeholders.
- Standardized CI/CD containerization workflows (Docker/Linux), ensuring 99.9% platform uptime.

RESEARCH & PROJECTS

SAHAI: Multimodal Depression Detection System

Python, Bi-LSTM, GAN, FastAPI

- Architected an ensemble framework integrating textual, audio, and visual modalities; achieved 98.46% accuracy.
- Published in IEEE INDIACom 2026; registered official copyright (Diary No. SW-17885/2026-CO).

AI Financial Crisis Predictor

Python, LSTM, XGBoost, Streamlit

- Engineered a financial risk framework using LSTM and ensemble methods to forecast market volatility.
- Published in 6th Edition of IEEE ICNTE 2026; registered copyright (Reg. No. SW-2026022638).

EDUCATION

Vidyavardhini's College of Engineering and Technology, Mumbai

Bachelor of Engineering in CS & Engineering (Data Science)

2026

CGPA: 7.20/10

Pace Junior Science College

Higher Secondary Certificate (HSC)

2021

Score: 88.34%

Thakur Vidya Mandir High School & Junior College

Secondary School Certificate (SSC)

2019

Score: 92.00%

LEADERSHIP & ACHIEVEMENTS

- **VCET Solection:** 1st Place at ESVC and SEVC national championships; managed business and technical subsystems.
- **Competitions:** Top 6 at Hackanova 2025; Smart India Hackathon Finalist.
- **Leadership:** Campus Ambassador for Coding Ninjas and ISIE India.
